First coronavirus infection case found in Lithuania

LETA

1 minute

The first coronavirus infection case is confirmed in Lithuania, as mentioned in Lithuanian government's statement released on Friday, 28 February, as reported by *15min.lt*.

The person infected with Covid-19 coronavirus is a 39 years old woman who had previously returned to Kaunas after a trip to Italy's Verona.

The infected woman has been put in Šiauliai hospital. Three of her relatives have been put under observation.
